

Resume of  
**Shoaib Sadiq**

# About

With experience of more than 13 years, started off as a domain and hosting provider in 2004 and later moved towards website designing and developed but soon realized that I cannot design... and continued with the development but with a slow pace.

Actively started working as a developer after starting job at Websoft Technologies in 2010. However I did a job in 2007 at Quality Copier Business as an International Coordinator just to gain some experience since it was my first time working in a professional environment.

Real change occurred after joining Creative Chaos right before 2011 was about to end which changed everything for me. I had strong technical knowledge and was eager to learn which helped me in quickly getting hold on things at Creative Chaos.

Meeting with clients, scrum meetings and working with a team of 100+ people was new and challenging for me but it groomed me and help me becoming what I've become now.

No matter what I have achieved I still get excited whenever I learn something new.

It has been 13 years, but I am still up for new challenges.

Let me know if I can help you with anything :-)
